

FHIR Insurer

Base Path: integration.dentaquest.com/ws/rest

Version: 1.0

The FHIR Practitioner API allows you to search for and look up insurers, health insurance providers that deliver health insurance plans. The endpoint provides the ability to:

- Retrieve all Insurer resources that match a search criteria.
- Retrieve one or more Insurer resources based on their resource ID.

This API is based on the FHIR standard, version 4.0.1.

Authorization: API Key authorization is required to access the resources of this API. Once approved, consumers will receive a valid API Key via email.

Methods

Search for Insurers

GET [base_path]/v1/fhir/payerdirectory/Insurer/

This method returns details of insurers that match the supplied search criteria. Insurer searches may be performed by supplying one of the following minimum criteria. Either:

- `_id`, or
- One (or more) of the following optional filters:
 - `name`

Parameters

Name	Type	Data Type	Description
<code>_id</code> optional	query	string	The id of the Insurer source Sample Value: DH-8e3fgfd0-f5cd-4cc9-b99j-081008f738fa
<code>name</code> optional	query	string	Fragment of the name of the Insurer to search for Sample Value: demo provider

Responses

`application/json+fhir`

200
