

CHECK YOUR CHILD'S TEETH

How do you know if your child has a dental problem?

When your children brush their teeth, take some time to check their teeth to be sure they are doing a good job of brushing and to make sure their teeth are healthy.

Pay attention to the problem:

- Dark spots on the teeth
- Holes in the enamel
- Pain in mouth
- Teeth that are sensitive to heat, cold or sweets
- Teeth painful or sensitive when chewing
- Gums are "pulling away" from the teeth

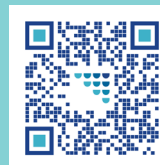

If you notice any of these problems with your child's teeth, schedule an appointment with a dentist as soon as possible.

The problem is easier to fix if treated early.
