

# DENTAQUEST IS HERE TO HELP

Providing Cleaner and Safer Dental Environments

Dentist offices are considered high-risk environments, according to John Howard, M.D. Director, NIOSH, "...workers in the dental field are among those with the highest occupational risk of exposure to SARS-CoV-2 and other disease-causing aerosols..."<sup>1</sup>

You can make your practice cleaner and safer with UV-C light treatment technology by UV Angel. The demonstrated technology automatically and continuously treats the air and surfaces for bacteria, viruses and fungi. People are the source of contamination in the indoor environment. UV Angel Clean Air™ safely and continuously neutralizes and reduces the spread of bioaerosols.

UV Angel Adapt™ Series surface treatment technology, automatically monitors and treats high-touch keyboards and touchscreens. Along with standard cleaning measures, UV-light technology is a critical component in a layered approach for infection control in dental settings. By investing in UV Angel technology, you can reduce exposure to bacteria, viruses and fungi while providing peace of mind.

## About UV Angel

UV Angel is a disinfection control technology company that uses years of advanced research and development in ultraviolet light to help make the environments around us cleaner and safer by reducing bioaerosols. Proven safe, the company's fully automated and patented UV-C technology monitors and cleans the surfaces we touch and the air we breathe. UV Angel's technology is complemented by a proprietary data analytics platform that delivers critical insights and strategic advantages to leaders in healthcare, food service, corporate, education and many more industries.
