FLORIDA MEDICAID PROGRAM

DentaQuest would like to take this opportunity to remind you that all Medicaid providers and entities rendering services in the State of Florida must be enrolled in Medicaid and meet all provider requirements at the time the service is rendered. Every entity that provides Medicaid services must enroll as a [Medicaid provider](#).

All claims submitted require that all information related to billing, rendering, ordering, referring, prescribing, and attending providers be enrolled with Florida Medicaid. Providers should submit claims in a manner that matches the data on the [Florida Medicaid Provider Master List](#).

Revalidation is required every three to five years, providers must complete the [renewal process](#) by the expiration date on the provider's Florida Medicaid provider agreement. Providers are ineligible for payment from Florida Medicaid under the fee-for-service delivery system and from a Medicaid managed care plan for failure to renew the provider's application before the renewal date.

To enroll or revalidate:
