

FHIR Coverage

Base Path: integration.dentaquest.com/ws/rest

Version: 1.0

The FHIR Coverage API allows you to search for and look up coverage (insurance plan), which is a financial instrument that may be used to reimburse or pay for health care products and services. Includes both insurance and self-payment. The endpoint provides the ability to:

- Retrieve all Coverage resources that match a search criteria.
- Retrieve one or more Coverage resources based on their resource ID.

This API is based on the FHIR standard, version 4.0.1.

Authorization: OAuth 2.0 Bearer token + API Key authorization is required to access the resources of this API. Once approved, consumers will receive credentials and a valid API Key via email. The following request headers are also required:

- member-first-name
- member-last-name
- member-date-of-birth
- member-subscriber-id

Methods

Search for Coverage

GET [base_path]/v1/fhir/patientaccess/Coverage/

This method returns details of coverage plans that match the supplied search criteria. Coverage searches may be performed by supplying the following minimum criteria:

- _id

Parameters

Name	Type	Data Type	Description
_id optional	query	string	The id of the Coverage source Sample Value: DH-8e3fgfd0-f5cd-4cc9-b99j-081008f738fa

Responses

application/json+fhir

200

Returns a FHIR Bundle containing 0..* OperationOutcome resources and 0..* Coverage resources

Retrieve a single Coverage

GET [base_path]/v1/fhir/patientaccess/Coverage/{id}

This method returns the Coverage resource matching the requested resource ID.

Parameters

Name	Type	Data Type	Description
id required	path	string	The id of the Coverage source Sample Value: DH-8e3fgfd0-f5cd-4cc9-b99j-081008f738fa

Responses

application/json+fhir

200
