FHIR Network

Base Path: integration.dentaquest.com/ws/rest

Version: 1.0

The FHIR Network API allows you to search for and look up networks, healthcare provider insurance networks. A healthcare provider insurance network is an aggregation of organizations and individuals that deliver a set of services across a geography through health insurance products/plans. The endpoint provides the ability to:

- Retrieve all Network resources that match a search criteria.
- Retrieve one or more Network resources based on their resource ID.

This API is based on the FHIR standard, version 4.0.1.

Authorization: API Key authorization is required to access the resources of this API. Once approved, consumers will receive a valid API Key via email.

Methods

Search for Networks

GET [base_path]/v1/fhir/payerdirectory/Network/

This method returns details of networks that match the supplied search criteria. Network searches may be performed by supplying one of the following minimum criteria. Either:

- _id, or
- One (or more) of the following optional filters:
  - *name*

Parameters

Name	Type	Data Type	Description
_id optional	query	string	The id of the Network source **Sample Value:** DH-8e3fgfd0-f5cd-4cc9-b99j-081008f738fa
name optional	query	string	Fragment of the name of the Network to search for **Sample Value:** demo provider

Responses
